

Indoor Skittles Game

How to make

The Skittles are made from small drinking yogurt bottles.

Wash the bottles in warm soapy water and let them dry completely before decorating.

This game is different to the original Ten Pin Bowling, because each skittle is given a 'random' number and for every skittle a player knocks down, they add all the numbers together to get their score.

The player with the overall, higher score wins the game.

You choose how many skittles to make for your game.

My game only had 7 skittles, so it was small enough to fit on a large tabletop.

The more skittles you have will mean setting it up on the floor.

Numbering

Choose your numbers randomly and mark each skittle with a number.

Decorate your skittles, mine had a garden bird theme.
Use a plastic or rubber ball suitable for indoor safe play.
Your game is now ready to play with family and friends.
